SWINE TIMELINE

Day 1
ca. 1,5 kg

Day 2

Day 14
ca. 4,5 kg

WEANING
ca. 6-8 kg

WEEK 7
ca. 15 kg

WEEK 12
ca. 30 kg

REARING GILTS

GESTATING

LACTATING

GROWER FATTENING PIGS
ca. 30 kg - 75 kg

FINISHER FATTENING PIGS
ca. 75 kg - end

DAY 1 – WEANING

→ day 1 - 2

Newborn piglet

- Sow's colostrum:
 - immunity building
 - antibodies

→ day 3 - 14

Piglet Starter

- Sow milk in combination with **LACTOMASH**:
 - Complete mash feed
 - All necessary lactose, easily digestible protein and energy
 - Small quantities, dry or mixed with water

→ AVOIDING THE WEANING GAP

→ day 15 - Weaning

Weaning Piglet

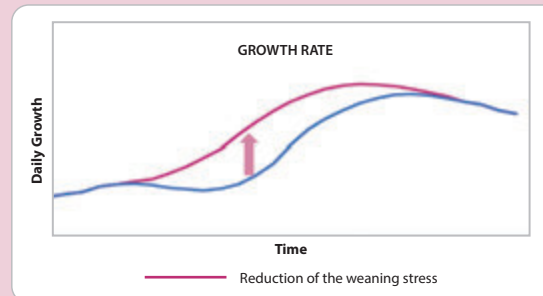

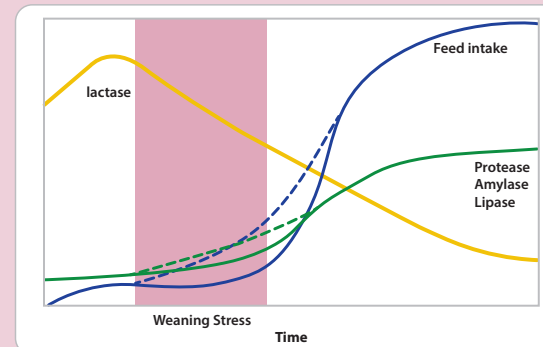

- Sow milk in combination with **MILKYSTRUCS**:
 - Complete pellet feed
 - All necessary lactose, easily digestible protein and energy

→ AVOIDING THE WEANING GAP

→ AVOIDING THE WEANING GAP

- Habituation solid feed before weaning
- Good housing (temperature, number of pigs,...)
- Biosecurity (hygiene, health,...)

WEEK 13 - WEEK 20 GROWER FATTENING PIGS

→ Inclusion of standard **concentrates** and **premises** containing extra additives guaranteeing optimal growth:

- FATTENING PIG CONCENTRATE** 5% - 30%
- FATTENING PIG PREMIX** 0,25% - 2,5%

→ **Tailor-made** solutions based on local needs

WEEK 21 - END FINISHER FATTENING PIGS

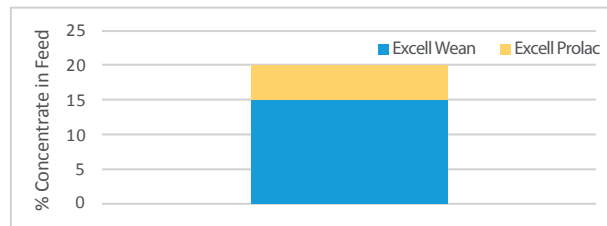

→ The same **concentrates** and **premises** are used for the final feed formulations in this second phase of fattening pigs to meet the recommended nutritional values.

WEANING – WEEK 7

3 OPTIONS:

- Further feeding with **MILKYSTRUCS**.
- Inclusion of **EXCELL WEAN** and **EXCELL PROLAC**:

→ Flexible ratios possible for different requirements

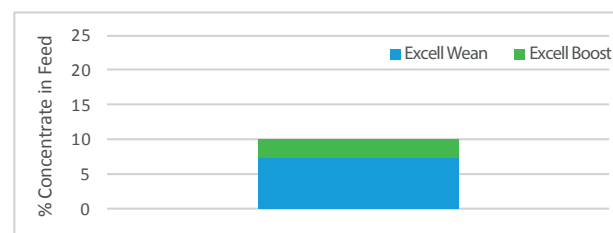

3. Inclusion of standard piglet **premises**:

- PIGLET PREMIX** 0,5%
- PIGLET PREMIX** 0,25%

WEEK 8 - WEEK 12

2 OPTIONS:

- Inclusion of **EXCELL WEAN** and **EXCELL BOOST**:

→ Flexible ratios possible for different requirements

2. Inclusion of standard **concentrates** and **premises**

- PIG STARTER CONCENTRATE** 5% - 30%
- PIG STARTER PREMIX** 0,25% - 2,5%

→ **Tailor-made** solutions based on local needs

REARING GILTS ca. WEEK 12 - MATURE

→ Inclusion of standard **concentrates** and **premises** containing extra additives guaranteeing optimal growth:

- FERTILAC SOW CCT** 5% - 30%
- FERTILAC SOW PREMIX** 0,25% - 2,5%

→ **Tailor-made** solutions based on local needs

GESTATING

LACTATING

→ Cycles of **gestating** and **lactating** sows.

- Same **concentrates** and **premises** as for rearing gilts.
- Altered final feed formulations to meet the nutritional values of each different phase.

Intra Toxinbind Xpro™

- High affinity substrate specific for a wide range of feed toxins
- LOWER TOXINS = MORE PROFIT
- Further information: see **ADD-OPTIMALS™**

Hi-7

- Most effective disinfectant
- GOOD HYGIENE = GOOD ANIMAL HEALTH = OPTIMAL PERFORMANCE
- Further information: see **HI-CONCEPT**
